Th	ne MAILING DATE of this communication				dress			
Period for Reply								
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.  - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.  - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.  - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.  - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).  - Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).  Status								
1)⊠ Re								
2a)□ Th	This action is <b>FINAL</b> . 2b)⊠ This action is non-final.							
3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under <i>Ex parte Quayle</i> , 1935 C.D. 11, 453 O.G. 213.								
Disposition of Claims								
4)⊠ Claim(s) <u>1, 3-19 and 21-36</u> is/are pending in the application.								
ŕ	4a) Of the above claim(s) is/are withdrawn from consideration.							
5) Claim(s) is/are allowed.								
-	6) Claim(s) <u>1,3-19 and 21-36</u> is/are rejected.							
•	7) Claim(s) is/are objected to.							
8) Claim(s) are subject to restriction and/or election requirement.								
Application Papers  9) The specification is objected to by the Examiner.								
10) ☐ The drawing(s) filed on is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.								
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).								
11) The proposed drawing correction filed on is: a) approved b) disapproved by the Examiner.								
If approved, corrected drawings are required in reply to this Office action.								
12) The oath or declaration is objected to by the Examiner.								
Priority under 35 U.S.C. §§ 119 and 120								
13) Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).								
a) ☐ All b) ☐ Some * c) ☐ None of:								
1. Certified copies of the priority documents have been received.								
2.[	2. Certified copies of the priority documents have been received in Application No							
<ul> <li>Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).</li> <li>* See the attached detailed Office action for a list of the certified copies not received.</li> </ul>								
14) Acknowledgment is made of a claim for domestic priority under 35 U.S.C. § 119(e) (to a provisional application).								
a) The translation of the foreign language provisional application has been received.  15) Acknowledgment is made of a claim for domestic priority under 35 U.S.C. §§ 120 and/or 121.

#### **DETAILED ACTION**

#### Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 2/24/03 has been entered.

### Claim Objections

Claims 1, 3-19, and 21-36 are objected to because of the following informalities: In claims 1 and 19, "ventrical" is misspelled and should be "ventricle". Appropriate correction is required.

## Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 3, 4, 6, 11, 15, 19, 21, 22, 24, 29, and 33 are rejected under 35 U.S.C. 102(b) as being anticipated by Haefner et al (5690683). Haefner meets the limitations of the term "reduced capacitance". In addition, Haefner describes figure 1 as a dual chamber cardioverter/defibrillator with pacing capability (col 3, ln 45) being able to operate in the unipolar or bipolar sensing modes having atrial and ventricular tip and ring electrodes, a can indifferent electrode, and a metallic housing. Haefner further describes in figure 2 the use of a

Art Unit: 3762

system in the bipolar mode using the tip and ring electrodes and indifferent can electrode. Finally, since Haefner senses between two electrodes he will meet the claimed limitation of sensing "between any two of said electrodes".

#### Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 5, 7-10, 12-14, 16-18, 23, 25-28, 30-32, and 34-36 are rejected under 35 U.S.C. 103(a) as being unpatentable over Haefner et al.

Haefner et al disclose the claimed invention except for the different particular combinations of unipolar or bipolar sensing between atrial electrodes (tip and/or ring), ventricular electrodes (tip and/or ring), and case/can electrodes. It would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the implantable

Art Unit: 3762

electrical therapy device using unipolar and bipolar sensing as taught by Haefner with different combinations of unipolar or bipolar sensing between atrial electrodes (tip and/or ring), ventricular electrodes (tip and/or ring), and case/can electrodes since it was known in the art that unipolar or bipolar sensing between atrial electrodes, ventricular electrodes, and case/can electrodes is used in pacemakers, defibrillators, and ICD's to sense heart activity and that particular configurations are chosen depending on the implantation of the leads and the sensing of the particular heart condition(s).

# Response to Arguments

Applicant's arguments filed 2/24/03 have been fully considered but they are not persuasive. The argument that Haefner fails to teach the sensing between "any two of the electrodes" is not persuasive since Haefner senses between two electrodes and will therefore sense between "any two" of the electrodes. The claims may want to state "wherein the sensing means can sense evoked responses between all combinations of any two of said electrodes" to claim all the sensing combinations, but those claims would still be rejected under 35 USC 103 as being well known in the art. One prior art reference (of many) showing that it is obvious to one having ordinary skill in the art to have the different claimed electrode combinations used for sensing is Sholder, 5222493 (previously cited). The motivation for the combination for the 103 rejection being that it is known to use the different combinations in pacemakers, defibrillators, and ICD's to sense heart activity and that particular configurations are chosen depending on the implantation of the leads and the sensing of the particular heart condition(s).

Art Unit: 3762

Conclusion

Any inquiry concerning this communication or earlier communications from the

examiner should be directed to George R Evanisko whose telephone number is 703 308-2612.

The examiner can normally be reached on M-F 6:30-5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Angela Sykes can be reached on 703 308-5181. The fax phone numbers for the

organization where this application or proceeding is assigned are 703 306-4520 for regular

communications and 703 306-4520 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding

should be directed to the receptionist whose telephone number is 703 308-1148.
